## BALLOON ENTERTAINER

Modeling balloons can be used virtually anywhere.

About a yard long and thin, they serve as the basic material for terrific balloon animals and fantasy shapes.

Twisted in a matter of seconds they make instant party favors for your guests.

You will be surprised to see the astounding number of fabulous balloon creations that can be twisted in no time.

All the children have to do is call out an animal or a cartoon character and the creation emerges right in front of their eyes.

This activity takes place in the middle of the audience. Your young audience is bound to love it! It's an ideal activity for promotional events of all kinds, as well as children's parties, trade shows, corporate events and fairs.

## MAGIC SHOW FOR CHILDREN

Today's children expect sophisticated entertainment that speaks their own language.

Acting as a sorcerer's apprentice, the child is always at the center of the action during my performances.

Between marveling at the show and laughing at the action, the children will be spellbound from beginning to end.

Things appear out of nowhere then magically turn into something else and vanish without a trace.

The indisputable highlight of my performance however is Rocky the raccoon.

But is he actually a real raccoon? Come and find out!

## STREET MAGIC SHOW

On the street only exceptional artists can be true artists. Street magicians perform before small or large audiences, whatever the situation demands and without smoke and mirrors.

The spectators form a circle the audience is in direct contact with the artist – a formidable challenge!

Experience the oldest trick in the world:

The "cups and balls" trick?

Balls disappear and then reappear – as fresh oranges!

Enjoy puzzling over how I managed to swallow a balloon in front of your very eyes. Experience the laws of nature being turned upside down.

You can take my word for it!
